

Do you have hundreds of photos sitting on your phone or computer and you want to display them on your walls but you don't know where to start? Or perhaps you have a photo you LOVE, but really want it photoshopped to give it that WOW factor.

I am here to help!

Displaying photos in your home

1. Which photos and what wall/s of your home?

- The first thing you need to do is walk around your house and think about where you have space to display some photos. You might decide you want one massive canvas to be the main focus of the living room but you don't know what photo to use, or how big. Or maybe you want multiple photos displayed on one wall as a photo wall & you can hang other things around your photos like [this](#). Perhaps the end of your hallway could do with a great photo that will make you smile every time you walk towards it, or your toilet needs a fun beach photo of the kids doing cartwheels in the sand?! It's time to put some life into your home!
- Choose one room at a time so you don't get overwhelmed.
- Look through your photos and think about which photo/s you love and want to show off. Remember you don't need to follow the latest fashion - go with photos YOU love.

2. Email me your favourite photos

- Simply email me your photos (10 photos maximum) to kyliedayphotography@gmail.com. They don't have to be photos I have taken for you, any of your favourites are fine! You might even have two photos of a similar thing, but you can't decide which one would look best printed - send me both and I'll give you my opinion.
- Sizing - If you want to enlarge your photos they must be saved in high resolution. Some photos taken on phones will be too small to be printed big. But don't let that stop you from displaying them on your walls - you may just have to print them smaller or I can turn them into a montage for you like this.
- Take a photo of the room/s you want to display photos in and email it to me so I can help you decide what might look best.

3. Let me help you

For no charge I'll email you back with some helpful advice and suggestions on what I think would look great on your walls & provide you with a price list to have this done.

Please remember you are not under any obligation to purchase anything.

If you decide to go ahead with your printing I'll get your order under way!

Canvases, prints & wall stickers are printed at a professional photography lab ensuring you get the very best quality.

Your order will be placed once payment has been made but please be aware some labs may not be up and running until NZ is at Level 2 and there may be a delay in getting them printed & delivered to you.

Canvases come in a variety of shapes & sizes - square, rectangle & panoramic. I can also make a montage using many photos to be printed on one canvas.

Wall dots (stickers) come in different sizes and can be peeled off your wall and moved if needed. These look amazing on your wall!

Get your favourite photos printed ready for framing & show off your family!

Photoshopping or Photo Restoration

If you have a photo you would like photo shopped I may be able to help you.

Photo shopping might include removing someone, or an object from a photo or simply removing blemishes, reduce redness or softening wrinkles from skin.

You might just want a photo cropped, or changed to black & white.

1. Please email me at kyliedayphotography@gmail.com with your photo in high resolution and instructions of what you want changed in Photoshop.
2. I will provide you with a quote depending on the job and time required.
3. If you're happy to go ahead I will make the alternations needed and email the image back to you.

before

after

For any questions please don't hesitate to [email](mailto:kyliedayphotography@gmail.com) me, or visit my [FACEBOOK](#) page.
